

Pentanob®

(Topical Spray)

The key to getting shiny strong hair with healthy follicles

Enriched formula for atopic dermatitis, eczema, keratitis, hair loss, and ringworm. It contains bactericidal antibiotics, anti-inflammatory, and antifungal agents, which act as a broad-spectrum formula against a wide range of pathogens causing skin affection in pet animals. In addition, it promotes healing and restores skin health without harsh chemicals.

For External Use Only

Composition:

Each 60 ml contains:

Dexamethasone	0.03 gm
Sodium salicylate.....	2.5 gm
Ciprofloxacin.....	10 gm
Miconazole.....	1 gm
Biotin.....	0.5 gm
Vitamin E.....	800 IU
Zinc.....	15 gm
Lysin.....	1 gm
Methionine.....	1 gm
Excipients up to.....	60 ml

Mechanism of actions:

- Dexamethasone is a potent steroidal anti-inflammatory agent used in the treatment of skin affections where the itch is too unbearable for a dog to tolerate. Besides, it helps relieve swelling, redness, itching, and allergic reactions.
- Salicylic acid belongs to the Salicylates class. It may work by helping the skin shedding of dead cells from the external layer and by decreasing redness and swelling.
- Hence, minimize the formed pimples.
- Ciprofloxacin is a broad-spectrum antibiotic that works against a wide bacterial range.
- Miconazole is FDA approved topical antifungal for pet usage to treat different fungal infections.
- Biotin is an essential element that plays a major role in repairing damaged skin and hair.
- Zinc is considered a necessary agent for skin and fur nourishment.
- Vitamin E is commonly used to enhance general skin condition, and effective in Canine Atopic Dermatitis (CAD).
- Lysine and methionine are working to retain skin moisture.

Product benefits:

- Ideal for alleviating itching, redness, and irritation caused by different allergins.
- Best drug of choice in topic dermatitis, eczema, keratitis, hair loss, and ringworm.
- Provide immediate itching relief and promote healthy skin regeneration.
- Enhance antibacterial, antiviral, anti-fungal, and anti-protozoal properties.
- Repair the damaged skin barriers and prohibit environmental allergens (such as pollens and mites)
- Acting as a soothing agent helps in skin moisture retention.
- Accelerates the dermal healing process.

Dose:

- **Mild to moderate cases:** applied once daily for 7 days.
 - **For severe infections:** applied twice daily for 7 days.
- * Don't applied on injured area.**

For Veterinary Use Only
